

西北地震学报

第十卷 总目录

第一期

- 预位移终止相与突跳型前兆类型.....秦保燕 江进 刘光远 (1)
- 斜交断层之间的相互作用.....陈学忠 (12)
- 模糊数学在西北地区场地震害预测中的应用.....王家鼎 (24)
- 鉴定活断层粘滑活动的一种新标志.....魏伦武 张诚 倪师军 (32)
- 三层倾斜电性层模型的电测深曲线反演.....史磷华 陈宝华 (38)
- 爆源地震效应的分析方法.....李清河 闵祥仪 郭建康 李刘玉 (44)
- 孔隙压力扩散与水库诱发地震活动性的初步研究.....龚钢延 (52)
- 水压致裂过程中的氦气反应.....李彤起 (60)
- 甘川陕宁青五省(区)部分地区的地壳结构.....董奇珍 (66)
- 我国西南地区气压场振动对云南及邻区 $M_L \geq 4.0$ 级地震的临震调制.....杨子汉 (75)
- 地旋与地震预报(英文稿).....郭增建 (85)
- 短文**
- 青川交界地区一个强震危险区的讨论.....雍幼予 (86)
- 1978年1月6日拜城5.9级地震.....戈澍谟 杨马陵 (88)
- 大地电磁观测中一种典型的煤矿地下电气作业干扰.....
.....张云琳 司玉兰 郭守年 安海静 (91)
- 1987年甘肃张掖地震和礼县地震的震源机制解.....姚立珣 田军 (95)
- 日本及千岛群岛特大地震的活动规律.....孙有山 (97)
- 述评**
- 评述《中国地震》.....赵淑贞 耿秀英 (99)

第二期

- 对气压、降雨等附加应力对井水位影响机理的理论分析.....罗奇峰 (1)
- 层状介质中膨胀球模拟力源的应力—应变场与视电阻率的关系.....
.....赵和云 钱家栋 (8)
- 低频交流电法的试验和研究.....桂燮泰 戴经安 关华平 (22)
- 我国西部及邻区强震活动的某些特征.....王桂岭 敖雪明 (29)
- 河西走廊地质构造基本特征以及榆木山北麓与黑河口上龙王活断层研究.....
.....李玉龙 邢成起 (35)

测震台网监测能力的评价研究及其在西北四省(区)台网建设中的应用.....邓明德(48)
系统聚类法在华北地区的地震分期和预测中的应用.....

.....马淑田 王碧泉 王玉秀 杨锦英 陈祖荫(56)

1605年琼州大地震构造应力场的三维光弹实验.....颜玉定 陈思民 黄咏茵(63)

短文

北京地震台网数字地震波形记录的波谱分析.....韦士忠 辛书义(71)

地震分析预报系统现代化建设初探.....石特临 郭大庆(80)

三种不同压缩条件下大型混凝土标本地震波变化特征的实验研究.....
.....李刘玉 金铭 蒋续媛(84)

1605年琼山大地震后强余震发生的时间特征.....李治矩(87)

* * *

地震预报和地震对策模型体系(英文稿).....谭承业(91)

论地震序列的一种可能的重要成因(英文稿).....张智 吴开统(104)

第三期

高速传播裂缝尖端附近的温升与震时地光现象.....黎在良 卢振业 杨嘉陵(1)

粘弹性介质中地震体波Q值的测定方法.....杜志俊(8)

1967—1982年康定—炉霍带M≥6.0级地震前的地震活动图象.....
.....成尔林 庞明虎(19)

大地电磁响应函数的除偏估算和误差的研究.....林长佑 武玉霞 刘晓玲(25)

安宁河活动断裂中断层泥扫描电子显微结构组合特征与断层活动方式研究.....
.....徐叶邦(39)

论地声序列在短临预报中的应用和意义.....乌统昱(45)

砂岩在摩擦滑动中的电阻率变化及其在地震预报中的应用.....
.....陆阳泉 钱家栋 刘建毅(51)

中国黄土地区基岩地震动经验衰减关系.....丁伯阳 雷中生 方淑兰(57)

“光弹性双轴应变计”在地应力测量中应用的可行性研究.....
.....高德禄 郭世凤 李淑恭 陈葛天 邵进(66)

我国福建陆缘地带的地热活动与地球物理场特征.....
.....魏斯禹 刘绍成 敖光华 滕红渊(74)

短文

节气与灾害.....郭增建 秦保燕(130)

可可托海—二台断裂断层泥的高压状态参数和动态弹性参数的测定.....
.....刘晓红 郝晋升 方亚如 蔡戴恩 李纪汉 耿乃光(82)

由地形变异常预报甘肃迭部5.9级地震及初步讨论.....张远孚 邹明武 郑文卿(85)

应力作用下不同介质中ρs优显层位的实验研究.....赵广堃 金铭 蒋续媛(89)

1986年8月26日门源6.4级地震的气象背景.....关振中(92)

1986年8月26日门源6.4级地震震害及烈度分布.....

NORTHWESTERN SEISMOLOGICAL JOURNAL

Vol.10

CONTENTS

№ 1

- Pre-displacement stopping Phase and Sudden Types of Precursor
.....*Qin Baoyan et al.* (11)
- The Interaction between two Intersecting Faults.....
.....*Chen Xuezhong* (23)
- Application of Fuzzy Mathematics in Prediction of Northwestern
Sites Damage.....*Wang Jiading* (31)
- A New Mark Identifying Stick Slip of Active Faults.....
.....*Wei Lunwu et al.* (37)
- A Method of Inverse Interpretation of Electric Sounding Curve
from Geoelectrical Observatory.....
.....*Shi Linhua and Chen Baohua* (43)
- The Methods to Analyse Seismic Effect of Explosion Source
.....*Li Qinghe et al.* (51)
- Primary Research on Pore Pressure Diffusion with Reservoir Induced
Seismicity.....*Gong Gangyan* (59)
- The Effect of Radon in the Process of Hydrofracturing Experi-
ments.....*Li Tongqi* (65)
- The Crustal Structure on a Part Area of Gansu, Sichuan, Shaanxi,
Ningxia and Qinghai Provinces.....*Dong Qizhen* (74)
- Impending-Earthquake Modulation Effects on $M_L \geq 4.0$ Events Occu-
rred in Yunnan Area and its Neighborhood by the Vibra-
tion of the Atmospheric Field in Southwest China.....
.....*Yang Zihan* (81)
- Significance of a Ground and Block Rotation in Earthquake
Prediction.....*Guo Zengjian* (82)
- Research Reports in Brief**
- The Discussion on Risk Area to Occur Strong Earthquake ($M \geq 7$)
in the Area Where Qinghai and Sichuan Meet.....

-Yong Youyu (87)
- The Baicheng Earthquake of $M=5.9$ on Jan. 6 1987 in Xinjiang
.....Ge Shumo and Yang Maling (90)
- A Typical Interference of Coal Mine Electric Equipments in Magnetotelluric Observation.....Zhang Yunlin et al. (94)
- Mechanism of the Zhangye Earthquake ($M=4.5$) and Lixian Earthquake ($M=5.0$) in Gansu Province.....
.....Yao Lixun and Tian Jun (96)
- Activity Regularity of Large Earthquake in Japan and the Kuril Islands.....Sun Youshan (98)

№ 2

- A Theoretical Analysis of Mechanism of Disturbance of Well-Water Level Caused by Additional Stress from Air Pressure and Rain Fall.....Luo Qifeng (7)
- Relationship between Apparent Resistivity and Stress-Strain Field in the Layer Media due to an Expanding Sphere as a Modelling Earthquake Source.....
.....Zhao Heyun and Qian Jiadong (21)
- Experiment and Discussion on the Low-frequency A.C. Method
.....Gui Xietai et al. (28)
- Some Features of Great Earthquakes Activities in Western China and its Vicinity.....Wang Guiling and Ao Xueming (34)
- Research on the Fundamental Characteristics of the Geological Structures of the Hexi Corridor and the Active Faults of the Northern and Eastern Flank of the Yumushan Mountain
.....Li Yulong and Xing Chengqi (47)
- Research and Evaluation on Premonitoring Ability for Seismic Network and its Application in Construction of Seismic Network in Shaanxi, Gansu, Ningxia and Qinghai areas
.....Deng Mingde (55)
- Dividing Seismic Active Periods with Modified Hierarchical Classification Method.....Ma Shutian et al. (62)
- Three-Dimensional Photoelastic Simulating Experiments to Tectonic Stress Field of Great Qiongzhou Earthquake of 1605 in Hainan, China.....Yan Yuding et al. (70)
- Research Reports in Brief**
- Spectral Analysis of Digital Waveform Record from a Seismic Network.....Wei Shizhong and Xin Shuyi (79)
- Probing to the Modernization Building of Earthquake Analysis and

- Prediction System.....*Shi Telin and Guo Daqing* (83)
- Experimental Study on Seismic Wave Variable Features of Large Scale Concrete Specimen under Three Different Compress Conditions.....*Li Liuyu et al.* (86)
- The Law of the Strong Aftershocks after the Qiongsan earthquake ($M=7\frac{1}{2}$) in 1605*Li Zhiju* (88)
- Model System of Earthquake Prediction and Countermeasures.....
.....*Tan Chengye* (89)
- On a Possible Important Genesis of Earthquake Sequence.....
.....*Zhang Zhi and Wu Kaitong* (92)

№ 3

- Temperature Rise near a Rapidly Running Crack Tip and the Phenomenon of Lightning at the Time of Earthquake.....
.....*Li Zailiang et al.* (7)
- The Measured Method of Seismic Body Q Value in the Viscoelastic Medium.....*Du Zhijun* (18)
- Seismic Patterns of Kangding-Luhuo Seismic Zone before Strong Earthquake ($M\geq 6.0$) during 1976—1982
.....*Cheng Erlin and Pang Minghu* (24)
- On the Unbiased Estimation and Error Research of Magnetotelluric Response Functions.....*Lin Changyou et al.* (38)
- Study on the Combinations of the SEM Characteristics of the Mineral Arrangements of the Gouges and the Patterns of the Movements of Anninghe Active Fault Zone.....*Xu Yebang* (44)
- Application and Significance of the Geosound Sequence in the Short-Term and Imminent Prediction.....*Wu Tongyu* (50)
- Resistivity Changes in the Frictional Sliding Experiments of Sandstone Samples and their Application in the Study of Earthquake Prediction.....*Lu Yangquan et al.* (56)
- Experimental Attenuation Relationship of Ground Motion on Basement Rock in Chinese Loess Region*Ding Boyang et al.* (65)
- Feasible Study on the Application in the Crustal Stress Measure of Photoelastic Biaxial Strain Gauge.....*Gao Delu et al.* (73)
- The Geothermal Activity and the Characteristics of Geophysics Field in Continental Margin of Fujian Province.....
.....*Wei Siyu et al.* (81)

Research Reports in Brief

- Jieqi and Disaster.....*Guo Zengjian and Qin Baoyan* (130)
- The Measurements of High Pressure Parameters and Dynamic Elas-

- tic Parameters for Gouge of Keketuohai-Ertai Fault.....
*Liu Xiaohong et al.* (84)
- Forecast and Discussion the Diebu Earthquake (M=5.9) In Gansu
 Province by Anomaly of Deformation.....
*Zhang Yuanfu et al.* (88)
- The Test Research of ps Obvious Layer in Different Rock Medium
 under Stress Function.....*Zhao Guangkun et al.* (91)
- The Meteorological Background of the Menyuan Earthquake(M=6.4)
 in 1986.....*Guan Zhenzhong* (94)
- Seismic Damage and Intensity Distribution of the Menyuan Earth-
 quake (M=6.4) in 1986.....*Dang Guangming et al.* (97)
- * * *
- A Preliminary Study on Sea-bottom Seismograph Observation in
 Bohai Sea Area, China.....*Feng Deyi et al.* (98)
- Discussion on Relationship between Circular Structure and Earth-
 quakes.....*Zou Jinchang* (124)

№ 4

- Mathematical Modelling of the 3-D Boundary Condition problem
 of Source Stress-strain Field in Horizontal Layered Visco-
 elastical Medium and the Corresponding Precursory Changes
 in Earth Resistivity.....*Ye Tonggui, Tang Quan, Qian Jiadong* (10)
- The Shear Rupture Sources and its Near-field Influence.....*Yao Lanyu* (28)
- The Influence of Fault Slip on Stress Field around It...*Su Gang et al.* (35)
- Statistical Analysis on Relationship between Moderate Strong
 Earthquakes in Shaanxi, Gansu, Ningxia and Qinghai Areas
 and Solar and Magnetic Storms Activity.....
*Zhang Shoujie et al.* (44)
- The Preliminary Analysis on the Triggering Action of Tilt Earth
 Tide to some Earthquakes of China.....
*Liu Guangyan et al.* (50)
- The Geometric Characteristics for the Segments of South and
 North Fringe of Aerjin Fault, SEM Features of the Fault
 Gouges and its Significance.....*Luo Zhijiang* (61)
- The Activity Characteristics of Earthquake Swarms and Earth-
 quake Sequences in Shanxi Seismic Zone.....
*Liu Wei, Zhao Xinping* (68)

Research Reports in Brief

- The Chaos and Predictable Duration.....*Guo Zengjian, Qin Baoyan* (70)
- Preliminary Observational Results of Tilt Earth Tide in Lanzhou

- Observatory.....Yang Jiawen et al. (75)
- The Research of Eh Effects in the Hydraulic Fracturing Experiment
.....Yang Jingxiu, Lei Lansheng (78)
- The Precursory Anomalies of the Earth Stress before the Menyuan
Earthquake.....Zheng Wenqing et al. (82)
- Preliminary Discussion of Some Questions about Selecting and
Building Transmissible Seismic Stations.....
.....Wang Yancheng, Lei Fang (86)
- The Discussion of Magnitude Deformation Method about Historical
Felt Earthquakes in Hubei Region.....
.....Xue Junrong, Yan Zunguo (89)
- Reviews**
- The Present State and Recent Development in some Fields of Stable
Isotopic Seismological Geochemistry.....
.....Zhang Biao, Shi Yaliu (93)
- The Possibility for Applying ϵ_r in Earthquake Prediction.....
.....Chen Youfa (95)
- * * * * *
- Characteristics of Spatial and Temporal Gravity Changes before
and after Moderate Strong Earthquakes in China
..... Ma Li, Wu Bing (96)

会 讯

地球物理灾害学术讨论会在湖南召开

中国地球物理学会于1988年11月20日—24日在湖南召开了“地球物理灾害学术讨论会”。会议由兰州地震研究所所长郭增建研究员主持，参加会议的有地震、水利、大专院校及科学院等部门的有关专家、学者。会上共交流论文20余篇。著名地球物理学家翁文波、河南省水利科学院王涌泉和赵得秀教授也向大会提交了研究论文及灾害预测意见。

会议从不同学科，用不同方法论证了未来十年内，尤其是近二、三年内我国可能发生的大灾害，并提出了成立高层次的“灾害研究与灾害防御协调小组”的建议。

THE SYMPOSIUM ON GEOPHYSICS DISASTER WAS HELD
ON NOV. 20—24, 1988 IN HUNAN PROVINCE
